

Bed and Breakfast Australia

There are three subscription categories on our website, www.bedandbreakfast.com.au

Bronze, Silver and GOLD.

A GOLD subscription on our website includes a photo of your property. This category remains at the top of the page, above any other listing categories. All properties within the GOLD category are shuffled automatically, thus enabling each GOLD listing equal time at the top of the page.

Please note: to check your property is rotating to the top position periodically, you may need to refresh your browser.

Only properties with a website are eligible for a GOLD listing.

What's that? You don't have your own website?

Let us create one for you – **FREE** – when you sign up for two years GOLD subscription.

YES! THAT'S RIGHT!

YOUR OWN FREE WEBSITE.

If you do not have your own website for your property, our website developer can create a website for you at no extra cost with a 2 year GOLD subscription. We will develop and host your Bed and Breakfast website plus list your property in our top listing category on Australia's premier B&B website – www.bedandbreakfast.com.au for 2 years for \$264. *There are no hidden costs, no hidden extras.*

At the end of your 2 yr GOLD subscription period you can:

1. Renew your listing and hosting with us for the next 12 months - \$132
2. Cancel your website hosting and listing – no cost
3. Choose have us host your website only – \$110
4. Take your website and register with a different URL (website name) - \$110 cost for packaging and passing onto a hosting company.

Your website will include four or five webpages including a “Home” page, a “Rooms” page, a “Photo Gallery” and a “Contacts” Page with a functional Google Map. Here are some examples of websites we have created for our clients -

www.portstephens.bedandbreakfast.com.au

www.kellers.bedandbreakfast.com.au

Given that your current online exposure is minimal, we are certain that your very own website and a GOLD listing on our site will increase your bookings.

We look forward to working with you to showcase your property on the world wide web.
